

6061 aluminum plus an anodized coat for a strong and durable corrosion and rust protection.

Thicker material throughout the entire device for added strength and reinforcement.

Comes with a Post Mount attachment for mounting the device to the post or piling of the dock.

The piling washer provides added strength for post mount installations.

The covered cap protects the lid, prevents debris from entering the canister, and preserves the battery life on the light.

6 bulkier blocks for added strength.

The longer and thicker line allows you to tie up bigger boats.
